EDUCATION

Indian Institute of Information Technology(IIIT), Pune

Nov 2022 – Jun 2026

B.Tech - Computer Science and Engineering with Honors in ML - CGPA - 8.69/10.0 Pune, Maharashtra

EXPERIENCE

IndiaMART

Jul 2026 - Present

Associate Engineer

Noida, Uttar Pradesh

- Manage and support the ApprovalPG PostgreSQL database, which powers approval workflows for external users.
- Monitor database operations, troubleshoot issues, and assist in maintaining database reliability and performance.

Agoda

Jan 2026 - Jun 2026

Software Engineering Intern - Scala, Akka, React.js, MySQL

Gurugram, Haryana

- Improved **location privacy** handling for properties by resolving flaws in coordinate obfuscation logic that could expose exact property locations.
- Upgraded legacy analytics tracking across **100+ event types** implementing schema changes to improve event reliability and accuracy.
- Resolved multilingual content synchronization issues across **10+ locales** by redesigning property update handling, ensuring users received the latest property information across locales.
- Fixed room-selection navigation logic by resolving DOM ID mismatches, performing RCA, and rolling out the solution under an experiment.
- Improved release reliability by developing **30+** automated test scenarios using Cucumber and Playwright.

Ridecell

Nov 2025 - Dec 2025

Software Engineering Intern - Python, Django, PostgreSQL

Pune, Maharashtra

- Resolved backend data-mapping issues across **5+** projects repositories, ensuring accurate vehicle information delivery.
- Performed root-cause analysis across Django services and PostgreSQL databases to diagnose and resolve high-priority production issues with minimal turnaround time.
- Debugged **10+** end-to-end API and UI data flows to identify and resolve production level city data inconsistencies.

CreditSea

May 2025 - Jul 2025

Software Engineering Intern - Typescript, Node.js, Next.js, MongoDB

Raipur, Chhattishgarh

- Built a dynamic dashboard to streamline daily follow-up calls, enabling the team to achieve **70%+** outreach efficiency across **5000+** active loan customers.
- Implemented advanced **MongoDB aggregation pipelines** and optimized filtering logic to speed loan data retrieval and improve risk-scoring accuracy.
- Designed notification using typescript and Firebase SDK to keep **3+** lakh users informed about their loan application.
- Introduced structured administrative checks and enforced mandatory remarks for loan approvals, increasing audit traceability and decision transparency.

PROJECTS

Monetra | Node.js, Express, PostgreSQL, chart.js

Feb 2025-Present

- Built income/expense tracking with category budgets, recurring transactions, savings goals, and secure authentication using JWT and Google OAuth 2.0.
- Designed an interactive **Chart.js** dashboard for spending insights, budget utilization, and monthly cash flow analysis.
- Integrated **Brevo API** for automated welcome emails, password reset workflows, and budget threshold alerts.
- Implemented **PDF/CSV export** for monthly financial reports, transaction history, and spending summaries.

TECHNICAL SKILLS

Programming Languages: Java, C/C++, Python, TypeScript, JavaScript, SQL, Scala

Technologies: Akka, Django, NodeJS, ExpressJS, MongoDB, PostgreSQL, MySQL, Rest APIs, ReactJS

ACHIEVEMENTS

- Achieved **Knight** rating (**1852**), ranking among the top 6% of LeetCode users globally. [LeetCode](#)
- 3 star** on codechef with Maximum rating of **1642**. [Codechef](#)

POSITION OF RESPONSIBILITY

QuantNum, Mathematics club of IIITP

Jan 2024 – Jan 2026

Founding Member & Public Relations

IIIT Pune

- Organized inter-college event Equation 2024 with **500+** participants.
